EXPERIENCE

Full-Stack Intern - Amadeus IT Group February - August 2018
Villeneuve-Loubet, Provence-Alpes-Côte d'Azur, France

- Developed a progressive web application to provide travelers' friends and family with realtime flight information: flight status, visual flight paths, local airport and traffic information, and notifications on take off and landing
- Built backend to consolidate streams of realtime flight telemetry data into a central database and REST API to query statuses of specific flights
- Technology Stack: Angular, Node, Apache Kafka, MongoDB

Frontend Intern - Amadeus IT Group Summer 2017
Waltham, Massachusetts, USA

- Worked on a flight search application to explore flights for vacations, requiring minimal search input from the user
- Created low to high fidelity prototypes for the application, incorporating feedback from project stakeholders over multiple iterations
- Technology Stack: Angular, Adobe XD

Lead Developer - Illini Motorsports August 2015 - Present
Urbana, Illinois, USA

- Illini Motorsports is the University of Illinois' Formula student team, which builds a formula-style race car each academic year
- Developed a progressive web app to visualize sensor data broadcasted from the race car, allowing race engineers to diagnose performance issues remotely, thereby reducing time taken for pit-stops during races
- Technology Stack: React, Redux, Particle Electron

Developer - CEAPS @ UIUC January 2017 - February 2018
Champaign, Illinois, USA

- Created a content management system for Digital Asia, an initiative by the Center for East Asian and Pacific Studies at the University of Illinois to curate and annotate educational films on Asia for high school students
- Technology Stack: Angular, PHP, MySQL

Full-Stack Intern - Amadeus IT Group Summer 2016
Waltham, Massachusetts, USA

- Developed a web platform to assist developers in updating project statuses and improve visibility of key performance indicators (KPI) for project stakeholders
- Technology Stack: PHP, MySQL, D3, HTML/CSS

EDUCATION

University of Illinois at Urbana-Champaign December 2019

B.S. in Aerospace Engineering, Minor in Computer Science

Relevant Coursework: Data Structures, Discrete Structures, Principles of User Interface Design, Interdisciplinary Design Studio, Design Thinking

FRAMEWORKS & SYSTEMS

Angular	Node	Git
React	Express	Flask
Redux	MongoDB	Bootstrap

LANGUAGES

JavaScript	Python	C++
TypeScript	Java	MATLAB
HTML	CSS	

DESIGN TOOLS

Adobe XD	Photoshop	Blender
Figma	Sketch	InVision

OPEN SOURCE PROJECTS

Angular Pipes

<https://github.com/fknop/angular-pipes>

- Library of Angular "pipes", which perform data transformations at the template syntax/HTML level
- **Contribution:** Developed pipe to add ordinal suffixes such as "st" in "1st" to numbers, useful for displaying ranks in leaderboards
- Project has 13,000 monthly downloads from the NPM registry

HACKATHON PROJECTS

Packeroo - Grand Prize Winner
AngelHacks Global Hackathon
Series 2017: Boston

- Skill for Amazon Alexa to parse travel itineraries and provide useful information to assist with packing
- Also won the "Best Alexa Voice Experience" prize by Amazon

Lapras - Best Use of Capital One's Nessie API

HackPrinceton Spring 2016

- Dashboard to analyze bank account activity and conversational bot to give warnings about future spending
